

Tuesday, March 7, 2023
City Council Workshop - Hybrid (In-Person & Electronic)

5:30 P.M.

City Council Workshop - Hybrid (In-Person & Electronic)

In-Person at the College Place Fire Department, 629 S College Avenue, College Place Washington

Workshop may be viewed at: Live Stream on City of College Place, Washington YouTube at https://www.youtube.com/channel/UCbx3qrqzLDL_05NusReSI-g/featured

Zoom Attendee Link: <https://us06web.zoom.us/j/87073568019>

Or you may call this number to listen: 1-669-900-9128 ID# 870 7356 8019 Phone controls: *6 - toggle mute/un-mute and *9 - raise hand

1. Opening Items.

Subject :	1.01 Call To Order
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category :	1. Opening Items.
Access :	Public
Type :	Procedural

Public Content

Mayor Hernández will call the workshop to order.

Subject :	1.02 Roll Call
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category :	1. Opening Items.
Access :	Public
Type :	Procedural

Public Content

Mayor Norma L. Hernández

Paul T. Jessup,

Michael Cleveland,

Tito Espinoza Jr.,

Council Members Loren Peterson,

Melodie Williams,
Heather Schermann,
Monica Boyle

Administrator, Mike Rizzitiello;
City Attorney, Rea Culwell;
Finance Director, Brian Carleton;
Public Works Director, Robert McAndrews;

Staff Police Chief, Troy Tomaras;
Fire Chief, David Winter;
Community Development Director, Jon Rickard;
HR Manager, Shawn Doering;
City Clerk, Sherri St. Clair

Subject : 1.03 Pledge of Allegiance
Meeting : Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category : 1. Opening Items.
Access : Public
Type : Procedural

Public Content

"I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one Nation under God, indivisible, with liberty and justice for all."

Subject : 1.04 Public Comment -
Meeting : Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category : 1. Opening Items.
Access : Public
Type : Information

Public Content

Council meetings are primarily structured to permit Council Membersto arrive at the decisions necessary to govern the City.

Meeting Protocol for Public Comment:

When submitting public comments, include the following information regardless of the manner you are using: Note that there are deadlines for writtencomments to be included in the meeting documents.

- Your Name
- Your Address

Written Public comments may be provided by submitting comment to Clerk@cpwa.usno later than 4:30PMon the meeting date to be included in the record.(If typewritten, no less than 11 pt font).

Verbal Public Comments may be made during the meeting:

- In-person at the meeting location - provided at the beginning of each agenda.
- Telephone comment - Call1-669-900-9128, entering the meeting ID (provided at beginning of agenda) and raise your hand (*9 to raise hand, *6 to mute/un-mute) when comments are requested.
- Virtual comment -Join using theZoom Attendee link (provided at beginning of agenda) and raise your hand when comments are requested.

Once recognized, you will have five minutes to speak on any subject that is under the control of the Council.

Subject :	2.02 Wastewater Treatment Plant Update - Mr. McAndrews and Mr. Fazzari
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)

Category :	2. Workshop Topics.
Access :	Public
Type :	Discussion, Information

Public Content

Workshop Only - No Action

Historical Perspective:

College Place and City of Walla Walla are continuing discussions about the regionalization of the WWTP.

At the February 14th Council meeting Council expressed concerns about the concept of College Place being a customer or renter of Walla Walla's, even if only on an interim basis.

Information for Consideration:

Public Works staff from both Cities have continued discussions and have included JUB Engineers. College Place has asked FCS Group if they will provide a high level overview at a joint council meeting covering the options of College Place being a renter, customer, or owner of the City of Walla Walla's wastewater system.

FCS Group is working on a proposal to facilitate a joint Council meeting in late March or April. They have been asked to discuss the renter/customer/owner topics for an interim user agreement as well as touching on the creation of a joint sewer district and things to consider including the concept of including the collection systems vs just treatment.

The intent is to hold the joint council workshop so all parties hear the same message and are able to ask questions. We also hope to discuss the formulation of a "task force" which would likely involve 2 members of each council, both City Administrators, both PW Directors, and representatives from JUB Engineers and Jacobs Group. The task force would start visiting other WWTPs where joint sewer districts have previously been formed. This will allow the task force to ask questions, seek input, and be better able to understand the challenges and opportunities that lie ahead.

Subject :	2.03 Solar Array Incident Overview - McKinsty - Mr. Lambarth and Mr. Coulter
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category :	2. Workshop Topics.
Access :	Public
Type :	Discussion, Information

Public Content

Workshop Only - No Action

Historical Perspective:

On Sunday 1/29/2023 one of the new solar panels caught fire.

Information for Consideration:

McKinstry responded and determined some contributing factors. McKinstry will discuss what happened, their response and findings, as well as contributing factors. They will also cover lessons learned and go over follow-up actions.

Subject :	2.04 Pavement Rating Study - Mr. Rizzitiello
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)
Category :	2. Workshop Topics.
Access :	Public
Type :	Discussion, Information

Public Content

Workshop Only - No Action

Historical Perspective:

The City contracted with Capital Asset and Pavement Services in Summer 2022 to conduct a pavement rating inventory of all city streets. No formal citywide pavement inventory was previously completed. The study was recommended for approval to City Council during the February 9th, 2023 Utilities & Transportation Advisory Commission Meeting.

Information for Consideration:

Please review the information and email the Public Works Director McAndrews (rmcandrews@cpwa.us) or City Administrator Rizzitiello (mrizzitiello@cpwa.us) with any questions. Edits were made based upon recommendations of the Utilities & Transportation Advisory Commission related to addition of an Executive Summary and Classifications.

Subject :	2.05 FY 2023 Community Grant Program Recommended Allocations - Mr. Rizzitiello
Meeting :	Mar 7, 2023 - City Council Workshop - Hybrid (In-Person & Electronic)

Category :	2. Workshop Topics.
Access :	Public
Type :	Discussion, Information

Public Content

Workshop Only - No Action

Historical Perspective:

The City Council created a Community Grant Program in 2020. This year the call for projects began the second week of December 2022 with applications due the end of the third week of January 2023.

Information for Consideration:

The City received eight applications. Thanks to the Ad-Hoc Committee of Dan Thesman (UTAC), Jenna Bicknell (PAR), and Bruce Morehead (EDTEC) for grading applications. The total amount of funds to the program for FY 2023 is \$15,000. The following is the recommended breakdown for grant awards.

City of WW Bikes & Ped Committee: \$500 (Full Request), WW Sustainable Living Center: \$5,000 (Full Request), Sonbridge: \$4,000 (Full Request), Common Roots: \$3,450 (46%), WWU Tool Library: \$1,610 (46%), Accessible WW: \$340 (46%), Garrison Creek Heights HOA: \$100 (33%), and Enactus: \$1,320 (33%). This will go for council action during the March 28th, 2023 meeting.

YOUTH CANNABIS AND COMMERCIAL TOBACCO PREVENTION PROGRAM

YCCTPP

Krista Timm

Lucinda Richards

INTRODUCTION

- Funding from DOH
- Regional Coordinator for Greater Columbia Region (Asotin, Benton, Columbia, Franklin, Garfield, Kittitas, Walla Walla, Whitman, and Yakima Counties)
- Local coordinator for tobacco and cannabis prevention
- Focuses on policy, systems and environmental changes

LIMITATIONS TO THE WORK

- Preemption limits local governments' ability to enact local policies to protect the health of their residents. Washington state currently preempts most local government action to prevent and control use of commercial tobacco. (chronicdata.cdc.gov)
- Washington is one of only two states in the country with preemption in four main policy areas of commercial tobacco control (Michigan is the other) (chronicdata.cdc.gov)
 - Advertising
 - Licensure
 - Smoke-free indoor air
 - Youth access
- Commercial tobacco funding has been decreasing over time, last year (FY 21-22) we only received \$4,000 to do local tobacco work, and not every county in the region received funding. FY 2022-2023: \$11,000, anticipated 2023-2024: likely \$4000
- It's all about partnerships and strategic collaboration!
 - Blue Zones Project
 - Trilogy
 - National Organizations

WHAT HAVE WE DONE?

Assessing current signage and updating language etc.

- Parks
- Schools

Creating healthier spaces through policy change

- Events

STARS (Standardized Tobacco Assessment of Retail Settings)

STARS: TAKEAWAYS

- Retail locations marketing to youth:
 - Advertisements and nicotine products at eye level
 - Near candy, toys, etc.
- Flavored products targeting youth
- Many selling synthetic nicotine

SIGNAGE

- Partnered with Parks and Recreation to update signage in all parks
 - 27 signs total
 - English and Spanish
 - Added language around vaping

Welcome to College Place Public Schools!

NO VAPING

We care about the health of our community – thanks for not smoking, vaping or using other tobacco/nicotine products.

Welcome to College Place Public Schools!

We care about the health of our community – thanks for not smoking, vaping or using other tobacco/nicotine products.

SIGNAGE

- Designed by students from College Place High School
- Window clings vs signs
- Ordered 50 of each

CURRENT PRIORITIES

VAPING & YOUTH

- HYS survey from 2021 states that 26% of our 12th graders vape
 - 10% higher than in 2016
 - 11% higher than the state average
- What are we hearing?
 - Discussion with School Principals and Governor' office
 - School Recovery Navigator
- What are we doing
 - Local coalitions- Education and School support
 - Addressing Community Norms
 - Creating more Tobacco Free Spaces
 - Promoting Cessation- Quitline & Quit kits
 - Youth Involvement

LOOKING AHEAD

- Work with retail locations to not target youth
 - Create list of best practices
- Advocate for more State prevention funding
- Educate parents and community members
 - How to identify products
 - How to talk to youth
 - Understanding effects on brain
- Address Synthetic Nicotine
- Partner with local coalitions

The background features a large white circle in the center, partially overlapping a light blue shape on the left and a light pink shape on the right. A dark blue shape is at the bottom. The word "QUESTIONS?" is centered in the white circle in a bold, dark blue font.

QUESTIONS?

Incident: College Place solar array

Overview and talking points

Updated 02/24/23

Date of incident: Sunday, 01/29/2023, approximately 11:45am

Location of incident: solar array at 55 SE Maple Ave, College Place, WA 99324

Client owner of facility: City of College Place, WA

What happened

- A single solar module in an unconnected ground-mount-on-asphalt array combusted
- Fire department responded and doused the fire
- Only the panel itself (and attached wires and components) was burned; no damage to surrounding area or land

Response and Findings

- McKinstry received a call about the incident later the same day and contacted the city manager Monday
- McKinstry team visited the site on 1/31/23 to investigate and inspect the array
 - Nothing was repaired or altered during this visit; only photos and notes were taken
- **Finding:** Upon the first investigation, a source circuit was found to be wired in reverse
 - This establishes “reverse polarity” - when present, a short circuit can occur
 - **Finding:** A short circuit occurred, damaging the module, causing a thermal event, and eventually, combustion
- McKinstry team returned to the site with the contractor to review and verify findings of first investigation
- Upon confirmation and agreement of the cause of the incident, the contractor corrected the wiring, replaced the destroyed module and three surrounding modules and performed required testing with McKinstry staff present
- McKinstry followed up with the contractor to provide the final report and this incident overview

Contributing Factors

- Contractor mistakenly made deviations from McKinstry-provided string layout in construction drawings
- An incorrect meter was used for DC polarity and open circuit voltage testing
- Identification and labeling procedures for conductors were mistakenly done incorrectly
- McKinstry staff were not notified of testing session and were, therefore, not on site to oversee testing
- A cold, sunny day provided perfect conditions for generating enough current in the damaged module that resulted in a thermal event and ultimately module failure and combustion

Lessons Learned

- McKinstry must be on site to oversee and confirm proper commissioning testing by the contractor
- There is a need to establish a “best practice” of leaving fuses out and the inverter’s DC disconnect open until the system is ready for startup
- More robust procedures must take place to ensure and enforce electrical contractors:
 - Follow proper National Electric Code (NEC) standards and identification methods
 - Use established method for permanent labeling of connections, splice points and terminations
 - Promote and require proper workmanship and wire management practices
- Sites should be equipped with the appropriate type of fire extinguisher during construction and kept on site/with the client/owner upon completion of build

Follow-Up and Further Actions

- Update McKinstry processes, procedures and design specifications to:
 - Require McKinstry trained personnel to be on site to oversee pre-functional commissioning testing
 - Ensure clarity that McKinstry be notified of any deviation from the provided PV string diagram and construction drawings *before* proceeding
 - Establish and implement rigorous specs for fuse insertion, permanent labeling methods and use of phase-appropriate conductors
 - Ensure a dry chemical fire extinguisher is kept, and remains, on site and/or with the client owner and that McKinstry advise clients on proper extinguishing procedures for an electrical/panel fire
- Support City of College Place and/or local first responders in understanding solar arrays and proper procedures for responding to an incident with a solar array and its components

What is next for the solar array?

Teams proceeded with inspection week of 2/20/23. Once inspections are passed, system start-up (interconnection) and functional commissioning testing will be completed.

Executive Summary

Capitol Asset & Pavement Services, Inc. was contracted by the City of College Place Public Works to perform visual inspections of all paved streets maintained by the City of College Place (City). All 38.66 centerline miles of paved streets maintained by the City were evaluated in accordance with MTC standards. The Streetsaver Online 9.0 database was updated with the inspection data. Inspections were completed in September, 2022.

The Streetsaver maintenance decision tree was updated with standard treatments typically implemented by the City, and costs were updated to reflect current pavement maintenance treatment prices. A budgetary needs analysis was performed based on the pavement condition inspections and decision tree matrix, and four budget scenarios were evaluated to compare the effects of various funding levels.

The City's street network consists of 38.66 centerline miles of streets. A detailed visual inspection of the City's streets resulted in a calculated average PCI of 74. Using a 0-100 PCI scale, with 100 being the most favorable, a rating of 74 places the City's street network in the 'Good' condition category.

Four scenarios were analyzed for various street maintenance funding levels. The budgets include preventative maintenance and rehabilitation work for existing paved street surfaces. The City's current strategy of street maintenance, along with current prices for the treatments, is represented in the Streetsaver decision tree matrix. This matrix defines what treatments need to be applied to streets in varying PCI conditions. Utilizing this decision matrix, it was determined that the City will need to spend \$10.8 million over the next five years to bring the street network into 'optimal' condition, or an overall street network PCI of 85. The City has approximately \$25.0 million in public works projects planned over the next five years, of which approximately half will be for reconstruction of street pavement. The \$10.8 million needs is in addition to that work, and all scenarios assume that that work is performed. The current funding level of \$475,000 over the next five years shows that the average network PCI decreases by three points, to 71 through 2027. Scenarios were also run to determine the funding levels required to maintain the current PCI of 74, as well as increase the network PCI by five points, to 79, over the next five years. Scenario analyses show that at current funding levels, the overall street condition will likely decline. Table 1 summarizes the findings of the Scenarios.

Table 1 – Summary of outcome of different funding levels (Scenarios)

Average yearly budget	\$2.2 million (1-Unconstrained Needs)	\$95,000 (2- Current Funding (\$100k per year))	\$300,000 (3- Maintain Current PCI (74))	\$800,000 (4- Increase PCI 5 points (to 79))
Total budget for 5 years	\$10.8 million	\$475,000	\$1.5 million	\$4.0 million
Current PCI	74	74	74	74
Current % in 'Good' condition	76.2%	76.2%	76.2%	76.2%
PCI after 5 years (change)	85 (+11)	71 (-3)	74 (0)	79 (+5)
Backlog after 5 years	\$0	\$10.1 million	\$9.2 million	\$7.5 million
% 'Good' in 5 years	98.2%	77.8%	84.5%	90.8%
% 'Fair' in 5 years	1.6%	7.6%	1.9%	1.6%
% 'Poor' in 5 years	0.2%	6.6%	5.6%	0.2%
% 'Very Poor' in 5 years	0.0%	8.0%	8.0%	7.4%

Purpose

This report is intended to assist the City of College Place with identifying street maintenance priorities specific to the City.

The report examines the overall condition of the street network and highlights the impacts of various funding levels on the network pavement condition and deferred maintenance funding shortfalls. The Metropolitan Transportation Commission, MTC, Streetsaver Pavement Management Program (PMP) was used for this evaluation. The intent of this program is to develop a maintenance strategy that will improve the overall condition of the street network to an optimal Pavement Condition Index (PCI) in the low to mid 80's and also to maintain it at that level.

The MTC Streetsaver program maximizes the cost-effectiveness of the maintenance treatment plan by recommending a multi-year street maintenance and rehabilitation plan based on the most cost-effective repairs available. A comprehensive preventative maintenance program is a critical component of this plan, as these treatments extend the life of good pavements at a much lower cost than rehabilitation overlay or reconstruction treatments. To this end, various 'what-if' analyses (scenarios) were conducted to determine the most cost-effective plan for maintaining the City's street network over five years and at various funding levels.

Pavement Management Strategy

Pavement Management is a set of tools and philosophies designed to manage the maintenance activities of asphalt concrete and Portland concrete pavements. A Pavement Management System consists of a module to keep track of existing and historical pavement condition data and a decision making process to help choose the most cost-effective maintenance strategies and which streets to treat when.

Conventional wisdom of most public works and street department agencies has been to treat streets in a “worst-first” philosophy. Under this “worst-first” policy, streets are allowed to deteriorate to a nearly failed condition before any rehabilitation (such as overlays or reconstructions), are applied. This can also be called the “don’t fix if it isn’t broke” mentality.

Pavement management systems are designed with a more cost-effective, “best-first” approach. The reasoning behind this philosophy, is that it is better to treat streets with lower-cost, preventative maintenance treatments, such as chip seals, slurry seals, and crack seals, and extend their life cycle before the street condition deteriorates to a state where it requires more costly rehabilitation and reconstruction treatments. Generally, paved streets spend about three-quarters of their life-cycle in fair to good condition, where the street shows little sign of deterioration and has a high service level. After this time, the street condition begins to deteriorate at a rapid rate and, if not maintained properly, will soon reach a condition where it will require costly overlays and reconstructions. If treated with a surface seal and other preventative measures, the street condition will remain at a good level for a longer period of time. Figure 1 shows a typical condition deterioration curve for a street.

Figure 1 – Street Condition over time

Existing Pavement Condition

The City is responsible for the repair and maintenance of 38.66 centerline miles of paved streets. The City's street network replacement value is estimated at \$99.17 million.¹ This asset valuation assumes replacement of the entire street network in present day dollars (street base and surface only, not curbs or sidewalk). This represents a significant asset for City officials to manage.

The average overall network Pavement Condition Index (PCI) of the City's street network is 74, which indicates that the street network is in 'Good' condition. The PCI is a measurement of pavement condition that ranges from 0 to 100. A newly constructed or overlaid street would have a PCI of 100, while a failed street (requiring complete reconstruction) would have a PCI under 25. Appendix B contains a report detailing the PCI information for each street.

Table 2 – Street Network Statistics and Average PCI by Functional Class

Functional Class	# of Sections	Centerline Miles	Lane Miles	Average PCI
Arterial	45	8.70	21.75	77
Collector	39	6.74	13.60	80
Residential	219	23.22	46.18	70
Totals	303	38.66	81.53	74

Table 3 and Figure 2 details the percentage of the street network area by each PCI range or condition category.

Table 3 and Figure 2 – Percent Network Area by Functional Class and Condition

Condition Class	PCI Range	Collector	Residential	Total
Good (I)	70-100	14.4%	41.5%	76.2%
Fair (II/III)	50-70	2.5%	3.4%	10.8%
Poor (IV)	25-50	0.8%	8.0%	8.8%
Very Poor (V)	0-25	0.0%	4.2%	4.2%
Totals		17.7%	57.1%	

¹ Replacement value is calculated as the current cost to reconstruct each street, This does not include sidewalks or curb.

The City's street condition varies by functional class, as is typical of most cities. Arterial and collector streets are in better shape than residential streets. The condition of and centerline miles of each functional class can be seen in Figures 3 through 6.

Figure 3 – Total Network Miles by Condition Category

Figure 4 – Arterial Miles by Condition Category

Figure 5 – Collector Miles by Condition Category

Figure 6 – Residential Miles by Condition Category

■ Good ■ Fair ■ Poor ■ Very Poor

Present Cost to Repair the Street Network

The MTC Pavement Management Program (PMP) is designed to achieve an optimal network PCI somewhere between the low and mid 80's, which is in the middle of the good condition category. In other words, the system will recommend maintenance treatments in an attempt to bring all of the streets in the City to a 'Good' condition, with the majority of the streets falling in the low to mid 80's PCI range. Streets will remain in the 'Good' condition category for a longer period of time if relatively inexpensive preventive maintenance treatments are used. Once the PCI falls below 70, more expensive rehabilitation treatments will be needed.

The Budget Needs module of the PMP estimates a necessary funding level for the City's pavement preservation and rehabilitation program of \$10.8 million² over the next five-year period (2023–2027) in order to improve and maintain the street network PCI at an optimal level in the lower to mid 80's. Of this total, approximately \$5.1 million is needed in the first year alone. The five-year cost of \$10.8 million exceeds the City's planned five-year funding level of \$475,000 by approximately \$10.3 million.

As mentioned earlier, the average PCI for the City's streets is 74, which is in the 'Good' condition category. Why then, does it cost so much to repair the City's streets, and why bother improving them?

The cost to repair and maintain a pavement depends on its current PCI. In the 'Good' category, it costs very little to apply preventive maintenance treatments such as crack and surface seals (slurry seal or chip seal), which can extend the life of a pavement by correcting minor faults and reducing further deterioration. Minor treatments are applied before pavement deterioration has become severe and usually cost less than \$4.00 per square yard³. 76.2% of the City's street network would benefit from these relatively inexpensive, life-extending treatments.

10.8% of the City's street network falls into the 'Fair' condition category. Pavements in this range show some form of distress caused by traffic load related activity or environmental distress that requires more than a life-extending treatment. At this point, a well-designed pavement will have served at least 75 percent of its life, with the quality of the pavement dropping approximately 40 percent. The street surface may require a chip seal or 2" overlay (depending on functional class and the extent of load related distresses), at a cost of \$3.50 to \$27.50/sq yd.

8.8% of the City's street network falls into the 'Poor' condition category. These pavements are near the end of their service lives, and often exhibit major forms of distress such as potholes, extensive cracking, etc. At this stage, a street usually requires an overlay, at a cost of \$25 to \$35/sq yd.

4.2% of the City's street network falls into the 'Very Poor' condition category. Streets in the 'Very Poor' condition category indicate that the street has failed. These pavements are at the end of their service lives and have major distresses, often indicating the failure of the sub base. Streets at this stage require major rehabilitation, usually the complete reconstruction of the street surface or street

² Treatment costs are based on this year's average costs per square yard, with future years including a 3% inflation adjustment per year after 3.

³ For detailed treatments and costs used in analysis for this report, see appendix C – Decision Tree report

surface and subgrade structure. Estimated costs to reconstruct the street surface are approximately \$110 to \$140/sq yd.

One of the key elements of a pavement repair strategy is to keep streets that are in the 'Good' or 'Fair' categories from deteriorating. This is particularly true for streets in the 'Fair' range, because they are at the point where pavement deterioration accelerates if left untreated. However, the deterioration rate for pavements in the 'Poor' to 'Very Poor' range is relatively flat and the condition of these streets will not decline significantly if repairs are delayed. As more 'Good' streets deteriorate into the 'Fair', 'Poor', and 'Very Poor' categories, the cost of deferred maintenance will continue to increase. The cost of the deferred maintenance backlog will stop increasing only when enough funds are provided to prevent streets from deteriorating into a worse condition category, or the whole network falls into the 'Very Poor' category (i.e. cannot deteriorate any further). The deferred maintenance backlog refers to the dollar amount of maintenance and rehabilitation work that should have been completed to maintain the street in 'Good' condition, but had to be deferred due to funding deficiencies for preventative maintenance and/or pavement rehabilitation programs. The actual repairs that are being deferred are often referred to as a "backlog."

Budget Needs

Based on the principle that it costs less to maintain streets in good condition than bad, the MTC PMP strives to develop a maintenance strategy that will first improve the overall condition of the network to an optimal PCI somewhere between the low and mid 80's, and then sustain it at that level. The average PCI for the City is 74, which is in the 'Good' condition category. Current funding strategies demonstrate there is a \$5.0 million deferred maintenance backlog⁴ in the first year of the scenario. If these issues are not addressed, the quality of the street network will inevitably decline. In order to correct these deficiencies, cost-effective funding and street maintenance strategies must be implemented.

The first step in developing a cost-effective maintenance and rehabilitation strategy is to determine, assuming unlimited revenues, the maintenance "needs" of the City's street network. Using the PMP budget needs module; street maintenance needs are estimated at \$10.8 million over the next five years⁵. If the City follows the strategy recommended by the program, the average network PCI will increase to 85. If, however, current pavement maintenance funding is exhausted and little or no maintenance is applied over the next five years, already distressed streets will continue to deteriorate, and the network PCI will drop to 66. The results of the budget needs analysis are summarized in Table 4.⁶

⁴ Definition of deferred maintenance backlog can be found in Appendix A

⁵ The City has approximately \$25.0 million in public works projects planned over the next five years, of which approximately half will be for reconstruction of street pavement. The \$10.8 million needs is in addition to that work.

⁶ Actual program outputs are included in Appendixes B through F

Table 4. Summary of Results from Needs Analysis

<i>Fiscal Years</i>	2023	2024	2025	2026	2027	Total
PCI with Treatment	83	83	83	85	85	---
PCI, no Treatment	74	72	70	68	66	---
Budget Needs Total	\$5,080,082	\$1,666,055	\$1,181,698	\$2,434,388	\$440,978	\$10,803,201
Rehabilitation Portion	\$4,173,848	\$1,521,022	\$1,005,505	\$2,131,407	\$292,993	\$9,124,775
Preventative Maintenance Portion	\$906,233	\$145,032	\$176,192	\$302,980	\$147,984	\$1,678,421

Table 5 shows the level of expenditure required to raise the City's pavement condition to an optimal network PCI of 85 and eliminate the current maintenance and rehabilitation backlog. The results of the budget needs analysis represent the ideal funding strategy recommended by the MTC PMP. Of the \$10.8 million in maintenance and rehabilitation needs shown, approximately \$1.7 million or 15.5% is earmarked for preventative maintenance or life-extending treatments, while \$9.1 million or 84.5% is allocated for the more costly rehabilitation and reconstruction treatments.

Figure 7 is based on the budget needs predictive module. The pavement management program is recommending a funding level of \$10.8 million over a five-year period. Figure 7 illustrates the funding distribution by street functional classification.

**Figure 7. Budget Needs Funding
Distribution by Functional Classification**

Budget Scenarios

Having determined the maintenance and rehabilitation needs of the City's street network, the next step in developing a cost-effective maintenance and rehabilitation strategy is to conduct 'what-if' analyses. Using the PMP budget scenarios module, the impact of various budget scenarios can be evaluated. The program projects the effects of the different scenarios on pavement condition PCI and deferred maintenance (backlog). By examining the effects on these indicators, the advantages and disadvantages of different funding levels and maintenance strategies become clear. For the purpose of this report, the following scenarios were run for five (5)-year periods (2023-2027). The City has approximately \$25.0 million in public works projects planned over the next five years, of which approximately half will be for reconstruction of street pavement. All scenarios assume this work will take place. Budget amounts are in addition to the cost of that work. The results are summarized in Table 5.

1. *Unconstrained (zero "deferred maintenance")* — The annual amounts, as identified in the budget needs analysis totaling \$10.8 million, were input into the scenarios module. This scenario shows the effects of implementing the ideal investment strategy (as recommended by the MTC PMP Needs module).
2. *Current Investment Level* — An average annual budget of \$95,000 was evaluated over five years, for a total of \$475,000, to determine the effects of continuing pavement maintenance at the current budget level. The overall network PCI decreases by three points, to 71, under this funding level.
3. *Maintain Current PCI (74)* — An annual funding level of \$300,000 per year, for a five year total of \$1.5 million, should maintain the overall network PCI at the current level of 74 through 2027.
4. *Increase PCI 5 points (to 79)* — An annual funding level of \$800,000 per year, for a five year total of \$4.0 million, should increase the overall network PCI by five points, to 79 by 2027.

Table 5. Scenario Summary

Scenario Name	5 Year Budget	2027 PCI (change)	2027 Deferred Maintenance	2027 % Good	2027 % Very Poor
1 – Unconstrained	\$10.8 million	85 (+11)	\$0	98.2%	0.0%
2 – Current Investment	\$475,000	71 (-3)	\$10.1 million	77.8%	8.0%
3 – Maintain Current PCI (74)	\$1.5 million	74 (0)	\$9.2 million	84.5%	8.0%
4 – Increase PCI 5 points (to 79)	\$4.0 million	79 (+5)	\$7.5 million	90.8%	7.4%

Scenario 1 — Unconstrained Needs (zero deferred maintenance)

This scenario shows the effects of implementing the ideal investment strategy (as recommended by the MTC PMP needs module). Because it is more cost-effective to eliminate the deferred maintenance backlog as quickly as possible, the bulk of the deferred maintenance needs are addressed in the first year of the five-year program, raising the overall average network PCI to 83. The PCI maintains at an optimal level through 2027. By 2027, 98.2% of the network improves into the 'Good' condition category, a significant increase from the current level of 76.2% in 'Good' condition. These results are shown in both Table 6 and Figure 8.

Table 6. Summary of Results from Scenario 1 — Unconstrained Needs

	2023	2024	2025	2026	2027	Total
Budget Total	\$5,080,082	\$1,666,055	\$1,181,698	\$2,434,388	\$440,978	\$10,803,201
Rehabilitation budget	\$4,173,848	\$1,521,022	\$1,005,505	\$2,131,407	\$292,993	\$9,124,775
Preventative Maintenance budget	\$906,233	\$145,032	\$176,192	\$302,980	\$147,984	\$1,678,421

PCI	83	83	83	85	85	

Figure 8. Summary of Results from Scenario 1 — Unconstrained Needs

Scenario 2 — Current Investment Level

This scenario shows the effects of the City’s current budget for street maintenance of \$475,000 over five years (in addition to the \$25 million to be spent for street reconstruction, sidewalks, and sewer work). Under this scenario, the overall network PCI decreases by three points, from 74 currently, to 71 by 2027. Under this investment level, the deferred maintenance backlog increases from \$5.0 million in 2023, to \$10.1 million in 2027, mainly due to the increase in the number of streets that will require expensive reconstruction, as the street network in ‘Very Poor’ condition increases to 8.0% in 2027, up from 4.2% currently,. The percentage of the street network in 'Good' condition improves, from 76.2% currently, to 77.8% in 2027. Results are illustrated in Table 7 and Figure 9.

Table 7. Summary of Results from Scenario 2 — Current Investment Level

	2023	2024	2025	2026	2027	Total
Budget Total	\$95,000	\$95,000	\$95,000	\$95,000	\$95,000	\$475,000
Rehabilitation budget	\$29,703	\$27,050	\$34,310	\$34,434	\$34,814	\$160,310
Preventative Maintenance budget	\$64,993	\$67,767	\$60,636	\$60,197	\$58,857	\$312,451
Deferred Maintenance	\$4,985,386	\$6,405,165	\$7,588,508	\$9,967,578	\$10,118,492	---
PCI	76	74	73	72	71	

Figure 9. Summary of Results from Scenario 2 — Current Investment Level

Scenario 3 — Maintain Current PCI (74)

This scenario analyzes the funding level that would be required to maintain the current network PCI of 74 over the next five years. An annual investment level of \$300,000, for a total of \$1.5 million over five years, would be needed to achieve this goal. Even though the PCI remains level, the deferred maintenance backlog increases, from \$4.8 million in 2023, to \$9.2 million by 2027. The street network in ‘Very Poor’ condition increases from 4.2% currently, to 8.0% in 2027. The percentage of the street network in the ‘Good’ condition category increases to 84.5% in 2027, from the current level of 76.2%. These results are illustrated in Table 8 and Figure 10.

Table 8. Summary of Results, Scenario 3 — Maintain Current PCI (74)

	2023	2024	2025	2026	2027	Total
Budget Total	\$300,000	\$300,000	\$300,000	\$300,000	\$300,000	\$1,500,000
Rehabilitation budget	\$118,617	\$102,455	\$97,897	\$106,683	\$110,492	\$536,144
Preventative Maintenance budget	\$181,243	\$197,032	\$201,215	\$192,329	\$189,032	\$960,851
Deferred Maintenance	\$4,780,222	\$5,989,175	\$7,008,646	\$9,194,731	\$9,234,094	---
PCI	76	75	75	74	74	

Figure 10. Summary of Results from Scenario 3 — Maintain Current PCI (74)

Scenario 4 — Increase PCI 5 points (to 79)

This scenario analyzes the funding level required to increase the overall network PCI to 79 over the next five years. An annual funding level of \$800,000 would be required to achieve this goal. Even at this funding level the deferred maintenance backlog increases, from \$4.3 million in 2023, to \$7.5 million in 2027. The percentage of the street network in the ‘Good’ condition category increases to 90.8% in 2027, from the current level of 76.2%. The street network in ‘Very Poor’ condition increases from 4.2% currently, to 7.4% in 2027. These results are illustrated in Table 9 and Figure 11.

Table 9. Summary of Results, Scenario 4 — Increase PCI 5 points (to 79)

	2023	2024	2025	2026	2027	Total
Budget Total	\$800,000	\$800,000	\$800,000	\$800,000	\$800,000	\$4,000,000
Rehabilitation budget	\$451,203	\$478,914	\$438,555	\$476,453	\$438,039	\$2,283,164
Preventative Maintenance budget	\$347,559	\$320,693	\$361,132	\$323,060	\$361,300	\$1,713,744
Deferred Maintenance	\$4,281,320	\$5,276,207	\$5,816,504	\$7,624,554	\$7,492,690	---
PCI	77	77	78	79	79	

Figure 11. Summary of Results, Scenario 4 — Increase PCI 5 points (to 79)

A comparison of the four scenarios is summarized in Figures 12 and 13. Figure 12 depicts the deferred maintenance costs as they relate to PCI for the four scenarios evaluated. Figure 13 depicts the percent of the street network in the various condition categories for the four scenarios evaluated.

Figure 12 - Deferred Maintenance and PCI of Scenarios 1-4

Figure 13 – Pavement Condition Category Percentages in 2027 – Scenarios 1-4

Recommendations

Of the various maintenance and funding options considered, the *ideal* strategy for the City is presented in Scenario 1, with a five-year expenditure total of \$10.8 million. Not only does this surface management plan improve the network to an optimal level of 85, it also eliminates the entire deferred maintenance backlog in the first year. As examined scenarios deviate from this strategy, the cost to the City will increase in the long term. However, the amount of funds in the first year of expenditure, approximately \$5.1 million, may make this strategy unrealistic for the City. This scenario can, however, be used as a base line for comparing other scenarios.

Under current five-year funding level (\$475,000 over five years), the network PCI decreases by three points, from 74 currently, to 71 by 2027. The deferred maintenance price tag doubles, from \$5.0 million in 2023, to \$10.1 million in 2027. By following this strategy through 2027, 77.8% of the City's street will be in the 'Good' condition category, an increase from the current level of 76.2% in 'Good' condition. The street network in 'Very Poor' condition increases from 4.2% currently, to 8.0% in 2027.

Scenario and Needs analyses assume that the City will follow a good pavement management philosophy of prioritizing preventative maintenance over rehabilitation. By first ensuring that Good streets stay Good, through the use of a cost-effective chip and crack seal program, the City will save money in the long run. The use of chip seals or thin AC overlays to rehabilitate streets in Fair condition should be the second priority, followed by thick overlays on Poor streets. Failed streets should be the lowest priority, as the reconstruction that would be required to rehabilitate them are very expensive, and the money is better used on more cost-effective treatments to maintain and rehabilitate better streets.

The PMP Budget Needs Module is recommending \$8.81 million for streets in the 'Poor' to 'Very Poor' condition. Because these categories require extensive rehabilitation and reconstruction work, the work will consume approximately 81.6% of the planned costs, as estimated by the PMP. This places the City in a challenging position of trying to avoid increasing future street rehabilitation costs coupled with the risk of a substantial increase in an already significant five-year shortfall projection. Currently, 4.2% of the street network is in 'Very Poor' condition. This is likely to increase to 8.0% in five years if current funding levels continue. This conclusion is noteworthy to the City Council. Many of the City's streets are in failed conditions, and this will continue to get worse unless increased funding is allocated for street maintenance and rehabilitation. The City should seek to increase funding for street maintenance.

As demonstrated in the different scenarios, the City needs to invest a significant amount of money on expensive rehabilitation and reconstruction projects. This will reduce the deferred maintenance backlog, increase the network PCI, and allow money to be spent for less capital-intensive treatments such as crack sealing and thin overlays in the future.

Preparation of a budget options report is just one step in using the MTC PMP to build an effective street maintenance program. Recommendations for further steps are:

- Obtain detailed subsurface information on selected sections before major rehabilitation projects are contracted. Costs for large rehabilitation projects are extremely variable and estimates can

sometimes be reduced following project-level engineering analysis. It is possible that only a portion of a street recommended for reconstruction actually requires such heavy-duty repair.

- Consider grouping treatments by geographic location in the City. This can help lower the overall cost of treatments, as well as help simplify logistics. The recommended treatments in Appendix F are determined by best timing according to the PCI, regardless of location. Often, overlays can be advanced or delayed by a year or so, and seals performed by one to two years early, without significant loss of cost-effectiveness. Adjusting the timing of treatments with geographic location in mind is recommended.
- Link major street repairs with utility maintenance schedules to prevent damage to newly paved street surfaces. Consider delaying treatment on streets with upcoming utility work, where appropriate.
- Evaluate the specific treatments and costs recommended by the PMP and modify them to reflect the actual repairs and unit costs that are expected to be used.
- Test other budget options with varying revenues and preventive maintenance and rehabilitation splits.

In addition to performing cyclic pavement condition inspections, unit cost information for the applications of various maintenance and rehabilitation treatments should be updated annually in the PMP ‘Decision Tree Module’. If this data is not kept current, the City runs the risk of understating actual funding requirements to adequately maintain the street network. A pavement inspection cycle that would allow for the inspection of arterial and collector streets every two years and residential streets every three to four years is recommended.

The City has completed the foundation work necessary to execute a successful pavement management plan. At the current investment level, the overall street condition will likely decline, and the deferred maintenance backlog will likely increase as more streets fall into ‘Poor’ and ‘Very Poor’ condition. To reduce the deferred maintenance backlog, additional revenues and support from various decision-making bodies are required.

As more ‘Fair’ streets deteriorate into the ‘Poor’ and ‘Very Poor’ categories, the cost of deferred maintenance will continue to increase. The cost of the deferred maintenance backlog will stop increasing only when enough funds are provided to prevent streets from deteriorating into a worse condition category, or when the whole network falls into the ‘Very Poor’ category (i.e. cannot deteriorate any further). At that time, the network would have to be replaced at a cost of \$99.17 million.

Appendix A

Definitions

The *Pavement Condition Index*, or PCI, is a measurement of the health of the pavement network or condition and ranges from 0 to 100. A newly constructed street would have a PCI of 100, while a failed street would have a PCI of 25 or less. The PCI is calculated based on pavement distresses identified in the field.

Network is defined as a complete inventory of all streets and other pavement facilities in which the City has jurisdiction and maintenance responsibilities. To facilitate the management of streets, they are subdivided into management sections identified as a segment of street, which has the same characteristics.

Urban Arterial street system carries the major portion of trips entering and leaving the urban area, as well as the majority of through movements desiring to bypass the central City. In addition, significant intra-area-travel such as between central business districts and outlying residential areas exists.

Urban Collector Street provides land access service and traffic circulation within residential neighborhoods, commercial, and industrial areas. It differs from the arterial system in that facilities on a collector system may penetrate residential neighborhoods.

Urban Local Street system comprises all facilities not one of the higher systems. It serves primarily to provide direct access to abutting land and access to the higher systems.

Preventive Maintenance refers to repairs applied while the pavement is in “good” condition. Such repairs extend the life of the pavement at relatively low costs, and prevent the pavement from deteriorating into conditions requiring more expensive treatments. Preventive maintenance treatments include chip seals, crack sealing, and deep patching. Treatments of this sort are applied before pavement deterioration has become severe and usually cost less than \$4.00/sq. yd.

Deferred Maintenance refers to the dollar amount of maintenance and rehabilitation work that should have been completed to maintain the street in “good” condition, but had to be deferred due to funding deficiencies for preventative maintenance and/or pavement rehabilitation programs. The actual repairs that are being deferred are often referred to as a “backlog.”

Stop Gap refers to the dollar amount of repairs applied to maintain the pavement in a serviceable condition (e.g. pothole patching). These repairs are a temporary measure to stop resident complaints, and do not extend the pavement life. Stopgap repairs are directly proportional to the amount of deferred maintenance.

Surface Types – AC is an Asphalt Concrete street that has one year’s asphalt, for example a street that has been newly constructed or reconstructed. In contrast AC/AC is a street that has an overlay treatment over the original asphalt construction. Streets marked as ST do not have an asphalt concrete layer, only a surface composed of layers of oil and rock (macadam or chip seal). Portland Concrete Cement streets (PCC) are a mix of Portland cement, coarse aggregate, and sand.

Load related distress - Load related distresses, such as alligator cracking, rutting, and depressions are usually a sign of a sub-base issue, caused by repeated traffic loads.

Non-load related distress - Non-load (or environmental), distresses typically have environmental causes related to the pavement becoming older and less elastic (brittle). Typical non-load distresses are longitudinal or transverse cracking, block cracking, and surface weathering and raveling.

‘Good’ Condition Category – Streets in ‘Good’ condition have no to little distresses found on them. These streets may have some minor surface weathering or light cracking, but can generally be maintained with cost-effective preventative maintenance treatments (surface seals and crack seals).

Pavement is stable. New or lightly worn appearance. Minor cracking may be present, but cracks are generally less than $\frac{1}{4}$ " wide or are well sealed. May have sporadic cracking in the wheel paths with no or only a few interconnecting cracks and no spalling or pumping. Minor patching and possibly some minor deformation evident. Good riding qualities. Rutting may be present but is generally less than $\frac{1}{2}$ ".

‘Fair’ Condition Category – Streets in ‘Fair’ condition show some form of distress caused by traffic load related activity or environmental distress that requires more than a life-extending treatment. The MTC Streetsaver program separates these into two condition categories for the purposes of the analysis. Category II – ‘non-load’ and Category III – ‘load-related’, based on whether a majority of the distresses found had load or environmental related causes

Pavement structure is generally stable with only minor areas of structural weakness or pavement deterioration evident. Cracks, if present, have widths generally less than $\frac{3}{4}$ ". Wheel paths may have widespread, but not continuous, cracking with no or only a few interconnecting cracks and no spalling or pumping. Interconnected alligator cracks forming complete patterns, or with spalling, are very small localized areas and are not representative of the rest of the section. The pavement may be patched but not excessively. Rutting may be present but is generally less than $\frac{3}{4}$ ".

'Poor' Condition Category – Streets in 'Poor' condition are near the end of their service lives and often exhibit major forms of distress such as potholes, extensive alligator cracking, and/or pavement depressions.

Areas of instability, structural deficiency, or advanced pavement deterioration present in small areas (generally <10% of total pavement area). Continuous, interconnected alligator cracking often present (mostly in wheel paths). Wheel paths may have widespread, and continuous, cracking with some interconnecting cracks and/or spalling (none or isolated areas of pumping). Deformation may be somewhat noticeable.

'Very Poor' Condition Category - Streets in the 'Very Poor' condition category indicate that the street has failed. These pavements are at the end of their service lives and have major distresses, often indicating the failure of the sub base

Areas of instability, structural deficiency, or advanced pavement deterioration are frequent. Large crack patterns (alligatoring), heavy and numerous patches, potholes, or deformation is very noticeable. Rutting, if present, is generally greater than 3/4".

Scenario - Planned CIP Projects

Scenarios - Sections Selected for Treatment

Scenario 1 - Unconstrained Needs

Scenario 2 - Current Budget Scenario

Scenario 3 - Maintain Current PCI

Scenario 4 - Increase PCI 5 points

*Each Scenario includes the Planned CIP projects from the current \$25M budget for the next five years these sections are detailed in the Scenario - Planned CIP Projects report and marked with ** in the Sections selected for Treatment reports*

CITY OF COLLEGE PLACE ORDINANCE NO. 17-015

AN ORDINANCE OF THE CITY OF COLLEGE PLACE ESTABLISHING THE COLLEGE PLACE TRANSPORTATION BENEFIT DISTRICT AND SPECIFYING THAT THE BOUNDARIES OF THE DISTRICT WILL COINCIDE WITH CITY BOUNDARIES

WHEREAS, RCW 35.21.225 authorizes the legislative authority of a city to establish a transportation benefit district (“TBD”) for the purpose of acquiring, constructing, improving, providing, and funding transportation improvements within the TBD, subject to the provisions of Chapter 36.73 RCW; and

WHEREAS, transportation improvements are defined in RCW 36.73.015 to include projects contained in the transportation plan of a city, and which also includes investment in new or existing highways of statewide significance, principal arterials of regional significance, high capacity transportation, public transportation, and other transportation projects and programs of local, regional, or statewide significance including transportation demand management (“TBD Projects”); and

WHEREAS, TBD Projects may also include the operation, preservation, and maintenance of the previously mentioned facilities or programs; and

WHEREAS, the City of College Place (“City”) Capital Facilities Plan (“CFP”), as now existing and as it may exist in the future, constitutes and will constitute a “transportation plan” as contemplated by RCW 36.73.015; and

WHEREAS, the City’s CFP currently includes evidence indicating a need for a coordinated cost efficient approach to street resurfacing improvements and other improvements that may be funded by a TBD (“CFP Projects”); and

WHEREAS, the City Council finds that the CFP Projects are transportation improvements within the meaning of RCW 36.73.015 and therefore also are TBD Projects; and

WHEREAS, on April 11th, 2017 the City Council conducted public hearings in accordance with RCW 36.73.050, after giving proper notice describing the TBD Projects and activities to be funded by the TBD; and

WHEREAS, as part of its review of the merit of establishing a TBD, the City Council considered various funding options for a number of CFP/TBD Projects; and

WHEREAS, the Council finds that the City can most effectively undertake CFP Projects if it works in conjunction with a TBD; and

WHEREAS, the City Council finds that establishment of a TBD would enable the City, in conjunction with the process for the adoption of its annual updates to the CFP, to consider and adopt mechanisms to fund required City street resurfacing in a coordinated, efficient manner; and

WHEREAS, the City Council finds it to be in the best interests of the City to establish a citywide TBD to fund and implement TBD Projects consistent with Chapter 36.73 RCW and the City's CFP to enable the TBD to contract with the City for management and staffing of the TBD's operations, and for the mutual undertaking and/or funding of CFP/TBD Projects; and

WHEREAS, the City Council wishes establish a governing body for the TBD comprised of the City Council acting in an ex officio and independent capacity and to provide for the continuing operations of the TBD;

NOW THEREFORE, THE CITY OF COLLEGE PLACE CITY COUNCIL DOES ORDAIN:

Section 1: Findings

The City Council finds it is in the public interest to help provide an adequate level of funding for transportation improvements through establishment of a TBD.

Section 2: Formation of a Transportation Benefit District

The City, pursuant to RCW 35.21.225 and Chapter 36.73 RCW, hereby establishes and creates a TBD to be known and referred to as College Place Transportation Benefit District (CPTBD), subject to the following:

1. Establishment of the College Place Transportation Benefit District – General Authority

There is hereby created CPTBD with geographical boundaries comprised of the corporate limits of the City, as those boundaries may be adjusted in the future. CPTBD shall be a quasi-municipal corporation and an independent taxing "authority" within the meaning of Article VII, section 1 of the Washington State Constitution, and a "taxing district" within the meaning of Article VII, section 2 of the Washington State Constitution. CPTBD shall constitute a body corporate and possess all the usual powers of a corporation for public purposes as well as all other powers that may now or hereafter be specifically conferred by statute, including, but not limited to, the authority to hire employees, staff, and services, to enter into contracts, to acquire, hold, and dispose of real and personal property, and to sue and be sued. Public works contract limits applicable to the City of College Place shall apply to the district.

2. Powers and Operations of CPTBD

- a. CPTBD shall possess all of the powers of a transportation benefit district authorized pursuant to Chapter 36.73 RCW, including without limitation the power to legislatively approve a yearly vehicle tab fee of \$20, the power to request voter approval of, and thereafter impose and collect, a sales and use tax in accordance with RCW 82.14.0455, a vehicle fee in excess of \$20.00 up to \$100.00 as allowed by RCW 82.80.140. The TBD may impose an ad valorem tax pursuant to RCW 36.73.060, issue general obligation and/or revenue bonds in the manner and subject to the restrictions set forth in RCW 36.73.070 and form a local improvement district and impose assessments therefore, take those actions allowed, and subject to the limitations of RCW 36.73.0810, contract for street and highway improvements, and for its operations, exercise the power of eminent domain in the same manner as authorized for the City and accept and use gifts and grants.
- b. Consistent with RCW 36.73.020(4), the secretary/treasurer of CPTBD shall be the City Finance Director. As such, the Finance Director shall establish those funds and accounts on behalf of CPTBD as required and shall disburse funds and pay claims as approved by the CPTBD Board and prepare and maintain such accounts as appropriate and/or required by state or federal law.
- c. The City Attorney will serve as legal advisor to the CPTBD Board, except where separate counsel is engaged by CPTBD.
- d. Other City employees shall carry out the operations of CPTBD as agreed by CPTBD and the City. Such employees and the contracts of CPTBD shall be overseen and administered by the Mayor and his/her designee.
- e. CPTBD may contract with the City for operations services and materials, office space and equipment, and to undertake and/or fund CFP/TBD Projects undertaken jointly or by one entity or the other.

3. Governing Board

- a. Consistent with RCW 36.73.020(3), the governing board of CPTBD (the “CPTBD Board”) shall be the members of the College Place City Council acting in an independent capacity. The CPTBD Board shall have the authority to exercise the statutory powers set forth in Chapter 36.73 RCW and other applicable provisions of Washington State law. The CPTBD Board shall also include a Chairperson, who shall be the City’s Mayor and whom shall have those duties, rights, and obligations of a Mayor as set forth in RCW 35A.12.100.
- b. To carry out the purposes of this chapter, and subject to the provisions of RCW 36.73.065, the CPTBD Board is authorized to impose the following taxes, fees, charges, and tolls:
 - (i) A sales and use tax in accordance with RCW 82.14.0455;

- (ii) A vehicle fee in accordance with RCW 82.80.140;
 - (iii) A fee or charge in accordance with RCW 36.73.120. However, if the City is levying a fee or charge for a transportation improvement, the fee or charge shall be credited against the amount of the fee or charge imposed by the district. Developments consisting of less than twenty (20) residences would be exempt from the fee or charge under RCW 36.73.120; and
 - (iv) An ad valorem property tax as provided in RCW 36.73.060.
- c. The CPTBD Board may authorize and issue general obligation and/or revenue bonds in the manner and subject to the restrictions set forth in RCW 36.73.070.
- d. The CPTBD Board may form a local improvement district and impose assessments therefor and take those actions allowed, and subject to the limitations of RCW 36.73.0810.
- e. As required by RCW 36.73.160(1), as the same may be amended from time to time, the CPTBD Board shall develop a material change policy to address major plan changes that affect CPTBD Project delivery or the ability to finance the plan for funding and implementing the CPTBD Projects.
- f. Meetings of the CPTBD Board shall be governed by the procedural rules applicable to meetings of the City Council, as those rules may be amended by the City Council from time to time. CPTBD Board actions shall be taken by motion or resolution in the same manner and following the same procedure as for the adoption of City Council resolutions. Meetings of the CPTBD Board shall, whenever possible, take place on the same dates scheduled for City Council meetings; provided that the CPTBD meeting shall take place pursuant to its own agenda during a recess or otherwise outside of any regular business or special meeting of the City Council. The CPTBD Board meetings shall comply with the state Open Public Meetings and Public Records Acts and the officials of CPTBD shall be subject to Chapter 42.23 RCW, Code of Ethics for Municipal Officers – Contract Interests; provided, that the fact that CPTBD Board members and officials and Council members and City officials are simultaneously employed by both entities shall not be deemed a conflict of interest where CPTBD and City are parties to contracts and/or agreements.

4. Transportation Improvements Funded.

The funds generated by CPTBD shall be used for the CPTBD Projects described in this ordinance and/or allowed by state law. The CPTBD Projects may be amended in accordance with the material change policy described in Section 2(c) of this ordinance and in accordance with the notice, hearing, and other procedures described in chapter 36.73 RCW, including RCW 36.73.050 (2) (b), as the same may be amended from time to time.

5. Annual Report to Public.

As required by RCW 36.73.160(2), as the same may be amended from time to time, CPTBD shall issue an annual report, indicating the status of transportation improvement costs, transportation improvement expenditures, revenues, and construction schedules, to the public and to newspapers of record in CPTBD.

6. Dissolution of CPTBD

CPTBD shall be dissolved pursuant to the procedures set forth in chapter 36.73 RCW, when all indebtedness, if any, of CPTBD has been retired and when all of CPTBD's anticipated responsibilities have been satisfied.

Section 3. Severability; Construction.

If a section, subsection, paragraph, sentence, clause, or phrase of this ordinance is declared unconstitutional or invalid for any reason by any court of competent jurisdiction; such decision shall not affect the validity of the remaining portions of this ordinance. If the provisions of this ordinance are found to be inconsistent with the provisions of the College Place Municipal Code, this ordinance is deemed to control. This ordinance shall be liberally construed to permit the accomplishment of CPTBD purposes and objectives.

Section 4. This ordinance will be codified as CPMC 3.46.

APPROVED by me this 25th day of April, 2017.

2023 Community Grants Fund – City of College Place
Accessible Walla Walla response

1. A: We are planning events for late 2023 and early 2024. To support their success, we have been focused on marketing the Walla Walla Valley to tourists of differing abilities including those in wheelchairs, with walkers, sight and hearing impairments, and more. Our efforts include the on-going development of a website, email newsletters, print ads in publications aimed at those with differing abilities, NPR advertising, public relations efforts aimed at organizations who work with our target audiences, and supporting tourists with disabilities who are visiting the area to attend concerts at the Wine Country Amphitheater. Website development is essential and a tremendous effort as our goal is to build a central, comprehensive database for those from outside the region to know precisely what they can expect when planning their trips – from lodging, to restaurants, to wineries and breweries, to outdoor activities, to cultural activities – and beyond. Currently, about 55% of our unique website traffic comes from outside the Walla Walla Valley. Additional funding is required to support the website development, and to fund a Google AdWords campaign aimed at people with differing needs who live within 4 hours of Walla Walla, including Portland, Boise, Spokane, and Seattle. We aim to turn Walla Walla into a destination for those with differing abilities, an effort unique in the Northwest.

Future planned events include a hand bike race in conjunction with the Tour of Walla Walla (we need to get on the national circuit for this first), a wheelchair basketball tournament, and a bowling tournament.

B: Travel for those with disabilities is intimidating, as lodging, dining, and recreation must be pre-vetted as many hotels and retail establishments don't fully meet ADA standards – and if they do, it is the bare minimum required, which is not feasible for many people. By positioning Walla Walla as an inclusive and accessible community, we are confident that we will quickly build a new vertical of tourists. The handicapable tourism industry in the United States is roughly \$60B and continues to grow. We also plan to attend the Abilities Expo in Los Angeles in March 2023 to promote the Walla Walla region to those in

attendance and raise awareness of what our Valley offers to this niche tourist market.

2. Contact: Betsy Hadden, Accessible Walla Walla.

Fiscal agent: Downtown Walla Walla Foundation.

Number: 509-629-1503

Address: 2551 Palisades Lane, Walla Walla, WA 99362

Email: info@accessiblewallawalla.com

Project Information: Each hotel, dining establishment, social services group, retailer, and more in Walla Walla region is being vetted and consulted, supporting the development of in-depth information for those with differing abilities. When we begin hosting our events in spring in 2023, we will work with local hotels and businesses to ensure attendees have appropriate accommodations based upon their specific needs.

While our events are still under development, founder and Executive Director Betsy Hadden is a veteran event planner with a proven track record. Pre-pandemic, Hadden ran a successful event production company. She coordinated events that targeted and attracted out-of-market visitors to the Power House Theatre, and events for the Walla Walla Valley Chamber of Commerce, including the Walla Walla Hot Air Balloon Stampede and the Walla Walla Business Summit. We are confident in her unique ability to plan and execute thoughtful, community-building events which will attract participants from across the Northwest.

Our target audience at the moment is people with disabilities living in the Pacific Northwest who travel by plane and/or vehicle. Given that 26% of Americans have a disability of some sort and are not being actively recruited or catered to, this gives us a target audience in the tri-state region of nearly 3.5M people. Most often than not, those with disabilities also travel with a partner or caregiver when they travel. Whether it is a family with a disabled child, people who have suffered accidents, or the elderly with mobility issues, we aim to make Walla Walla the regional destination of choice.

We are marketing Walla Walla through our website (www.accessiblewallawalla.com), a site that remains under continual development as more locations are visited and

specifics added. We also market through print ads, and in regional publications aimed at those in wheelchairs, and in East of the Cascades magazine aimed at high-income households in King County, Washington. We are also adding NPR and Google AdWords as funding is available. We have also partnered with local groups, including the Walla Walla Valley Disability Network and the Downtown Walla Walla Foundation to spread the word of our efforts. Additionally, we have crafted a boilerplate news article that has been published in a national publication and is being pitched to other bloggers and media outlets. We recognize that continued development of the website is essential to becoming the authoritative source of information in the region.

Founded just one year ago, we have achieved a noticeable presence and are making a difference. We regularly receive calls and emails from people with questions about options for them when they are planning a trip or relocating to Walla Walla. This week, we received another relocation inquiry from a family with a daughter in a wheelchair requesting information on lodging and the potential of accessible real estate to purchase. We love that the website is attracting interest in Walla Walla from out-of-towners.

Our website provides the information for those of differing needs when they are making travel decisions that they would otherwise have to research for themselves. Thus far, it includes detailed information about restaurants, hotels, wineries, art walks, outdoor activities, cultural activities and more.

While not every place in the Walla Walla region meets the standards (and thus may not be included on the website), we have spent significant time meeting with local businesses to help them develop strategies to make their spaces more accessible for all. We would love to make College Place highly included in our process.

We are in discussion with local restaurants and wineries about how they might have their menus translated into braille to make them more accessible for those with vision impairments.

We are applying for \$1,000 of grant funds from the City of College Place for to assist website build out.

Other groups from who we have received funds:

- Port of Walla Walla
- Port of Columbia

- City of Milton-Freewater
- Clara and Art Bald Trust
- Mary Garner Essary Trust
- An anonymous private investor

By the end of 2023, we aim to raise \$70,000 to support our website efforts, market Walla Walla as a destination for the handicapped community to those across the Northwest and execute our first events.

Grant request: \$1,000

Cash match: \$0.00

In-kind match: \$2,300 from MCM Strategic & Communicaitons

Total project revenue: \$300,000 to the region this year.

Project expenses: \$1,000 to website development.

Total expenses for 2023: \$70,000

Project Milestones: Full website buildout by May 20, 2023 by AWW and their team.

Project Information Description of the project (include project purpose, approach and location).

The purpose of this project is to update and print the Walla Walla Regional Bike Map. The bike map was last updated in 2016 and partner entities who distribute the map have run out of printed copies of the map. The updated bike map will include all the new bike lanes, bike and walking paths and bike routes that the Cities of College Place and Walla Walla and Walla Walla County have added since the map was originally developed. Our goal is to bring a bike map that gives our community a tool that helps safely navigate the busy streets while cycling through town for work or recreation along with showcasing the walking paths throughout our great communities. The new bike map will be very tech friendly as we will include QR codes that will direct users to resources like: Valley Transit routes and live updates, construction project updates for Walla Walla, College Place and Walla Walla County (so cyclists and walkers alike will know how construction or route changes influence their trip) and a puncturevine reporting hotline. Once the map is updated, we plan to print and distribute over 10,000 bike maps to partner organizations throughout the Valley. While we have some funds raised to print hard copies of the map, additional funds will allow us to increase the number of map hard copies we can print.

The updated bike map consists of two maps. The updated bike map will consist of two maps. The first map is a close-up of Walla Walla and College Place bike routes, which will include detailed bike routes, bike lanes and walking paths. They have the free bike service stations including The Tread Shed at Walla Walla University. There will be about 8 QR Codes that will surround the map. They will make available information about bike safety, and the map will be dual language with information in both English and Spanish. Valley Transit will have a QR code to encourage integration of cycling with our local public transportation system. There will be codes to get to information about more regional routes and trails as well. The second map consists of bike routes throughout the entire Walla Walla Valley. It is a map that shows paved county roads that are designated bike routes. This map spans three counties, Umatilla, Walla Walla and Columbia counties. The map stretches from Ski Bluewood and Patit Road in Dayton over to Eureka North Road along Fish Hook Park in the small town of Eureka. The map stretches down to Touchet and down to Gardena and Stateline Roads and then on down to Umapine and then down to Milton-Freewater. The map continues to Harris Park and then down to Highway 204 and just outside of Tollgate and down to Athena, Weston and even over to Helix. The county bike map covers well over 600 square miles of our beautiful Walla Walla Valley.

Please describe how your project relates to the Community Grant Program Goals and the City's Comprehensive Plan Goals and Policies.

The Walla Walla Bike Map relates to the Community Grants Program goals in the following ways:

Steward the Community's Health: This resource is one of the many solutions that can steward the community's health by highlighting and publicizing safe bike lanes and routes. The more residents who are given a tool for cycling, for travel, for recreation and for sport can use the map for the planning of routes and for finding larger walking/cycling paths that can offer a safe outing spot for families who are just looking to get away from phone screens and out in the sunshine. The map will also promote physical activity by ensuring new cyclists as well as experienced cyclists know where and how to ride safely in our community.

Foster civic engagement and involvement: The more neighborhoods see cyclists using their streets and pedestrians using their sidewalks and nearby walking paths will hopefully create safer neighborhoods. Encouraging activity and the use of public spaces through active transportation can promote community engagement and social network development as well. It may also encourage neighbors to work together to foster safer blocks in which turn into the next bike route or walking path on the bike map in the future.

Steward the community's environment: In regards to enhancing the environment, the bike map can be a great tool for neighborhoods to make the changes needed to expand the map in future years. Encouraging individuals to spend more time outside helps people build a relationship with, and appreciation for, our physical environment. This could result in residents creating better gardens, planting more trees and helping the city maintain the cleanliness of the sidewalks and walking paths. With cyclists traveling streets like Whitman, Last Chance, Frog Hollow and Beet they can and are surrounded by the small farms and gardens of flowers, vegetables of all kinds, Walla Walla Sweet Onions, wheat, grapes and sunflowers. Along with all the farm animals, birds of all size and shape and deer the bike map can be used for a possible tool to advocate for safer roads and slower speed limits that can make more cyclists and tourists to visit these routes and roads. A healthy environment will help grow a healthy community for all walks of life.

Economic Development: Many tourists from around the world like to visit our Valley and support our local businesses. Many visitors like to explore our area on bike but this can be difficult if you are not familiar with safe cycling routes. Printing the updated bike map can help expose visitors to safe cycling routes and also help build our Valley's reputation as a cycling destination as well as a wine and food destination. As more people use the area for recreation, increased visits will result in more foot traffic to small farms selling goods, tourists making repeat trips to our area and more visitors to Whitman Mission and the many Heritage Markers where the history of our great community is told and the stories of old will forever live on.

Alignment with City of College Place Comprehensive Plan Goals:

Goal 1: Preserve small town character including friendly, family-oriented and safe: the regional bike map will help get more people out and about and promote safer cycling routes for people of all ages.

Goal 9: Provide a safe and efficient transportation and circulation system for use by all mode of transportation by helping increase active transportation throughout the region and promoting safer roads.

Goal 15: Protect environmental quality by encouraging active transportation and reducing carbon emissions from passenger vehicles.

Goal 20: Strengthen City partnerships and resources to support economic opportunities by strengthening a relationship between Visit Walla Walla, area bike shops, the City of Walla Walla, the Bicycle and Pedestrian Advisory Committee and the Walla Walla Rotary.

Project Revenue	Amount	
Grant Request	\$500.00	
Cash Match from Applicant	\$0.00	
In-Kind Match from Applicant Volunteer hours to design and update regional bike map (at \$29.95/hour for 20 hours total)	\$599.00	
Cash from other Sources	\$6,000.00	
Walla Walla City Council	\$3,000.00	
Walla Walla Rotary	\$2,500.00	
Visit Walla Walla	\$500.00

Milestone	Responsible Party	Projected Date for Completion	Outcome
Assigned to Update Bike Map March 2020	Don Holguin	March 2023	
Walla Walla GIS Department updated city bike map routes, paths and lanes	Don Holguin	July 2022	City bike map is updated with all information now officially part of the city's GIS databanks and is ready for print.
Walla Walla County updated bike routes	Emily Brown	July 2022	County personnel have updated all the bike routes outside of the city limits. Also included are updates to Columbia County into Dayton and Waitsburg.
City of College Place updated bike lanes, bike routes and bike and walking paths inside city limits	Emily Brown	July 2022	College Place personnel have updated all bike lanes, routes and bike and walking paths inside city limits. Efforts also included bike routes outside of the city limits into Walla Walla County up to Stateline Road.
Developing of QR Codes	Emily Brown	June 2022	The bike map will now be tech friendly. The map will now have eight QR Codes that will have information on street projects and construction, Valley Transit route information, Ride with GPS allowing for gravel route planning and information on Puncurevine. All the information will also be available in Spanish.
Raising of Printing funds	Don Holguin Emily Brown	July 2022	Outreach to several local businesses and organizations have led to the raising of \$6,000.00 for the print costs of over 10,000 bike maps
Spanish translations of bike safety information	Emily Brown	May 2022	The bike map will now have bike safety in both English and Spanish. All of the QR Codes will be in both languages.
Final map design goes to printers, map printed	Don Holguin Emily Brown	Quarter 1 of 2023	
Presenting of the new bike map to Walla Walla City Council and to the community at large	Don Holguin Emily Brown	April 2023	

City of College Place Council Funded Programs Community Grants Program

Introduction

The College Place City Council through the Community Grants Program desires to support community efforts to address community needs and build the capacity of the City of College Place. A Committee made up of Economic Development, Tourism, and Events Commission and Park, Arbor, and Recreation Board members will review and rank proposals. City Council will make the ultimate project awards. **Total allotment for FY 2023 is \$15,000**

Grant Program Goals

- Foster civic engagement and involvement
- Develop responses and solutions which steward the community's
 - Health
 - Environment
 - Social network and resiliency
 - Park & Recreation Network
- Develop programs which support community asset building and provide outreach through education and information programs which support program goals.
- Economic Development
- Housing
- Public Art

Program Guidelines

Eligible Applicants: Non-profit organizations, civic groups, neighborhood groups. Partnerships among individuals and/or groups will also be considered.

Eligible Locations: Within the City of College Place

Eligible Expenses: Personnel, professional services, supplies and materials, construction costs, public information and outreach.

Match: Matching funds are encouraged but not required for this program. The following items count as matching funds: cash, volunteer hours, and donated materials, equipment use, or

professional services.

Project Timeline

Application Due Dates: Applications must be submitted by January 20th, 2023 at 4 PM PST. Submit completed applications to:

City Administrator's Office
City of College Place
625 S. College Avenue
College Place, WA 99324
Email: mrizzitiello@cpwa.us

Award Decisions: Award decisions will be made within 60 calendar days of the January 20th, 2023.
deadline.

Project Time Limit: All projects must be completed within one years of award.

Application Process

Project Applications: Applications must be made either on paper or electronically on forms provided by the City. Applications can be obtained at City Hall, 625 S. College Avenue, College Place, Washington or on the City's webpage at www.cpwa.us

Project Description: The description of the project should include project purpose, approach, and location.

Goals: Explain how your project addresses the Grant Program Goals as outlined in the application packet and the City's Comprehensive Plan goals, policies and programs. The Comprehensive Plan itself is available on the City's website at:
http://www.cpwa.us/departments/planning/comprehensive_plan.php

Project Milestones: Provide quarterly milestones which indicate concrete progress toward the successful achievement of the project's goals.

Budget Plan: List each resource needed to complete your project. Please show in-kind, applicant cash, and how much of the City's funds to be spent on this resource.

- The value of volunteer labor as established by the Independent Sector's Value of Volunteer hours https://www.independentsector.org/volunteer_time

- Equipment donated is valued at the hourly rental rate for the equipment used for the project.
- Donated professional services are valued at the “reasonable and customary” rate for the services.

Review Process

A committee comprised of Economic Development, Tourism, and Events Commission as well as Park, Arbor, and Recreation Board members will review written applications. All eligible projects will be forwarded to the Committee and scored using the rating form included in the application packet. Higher ranking projects may be requested to present to the Committee.

The presentation, if requested, is limited to 15 minutes. Please give an overview of the project and how it furthers the City’s goals.

The Committee will make a funding recommendation to the City Council. City Council will make the final determination of funding. Applicants may be asked to present their projects to the City Council.

Reporting Requirements and Accountability

A contract will be executed to outline the specific conditions of the project if awarded.

Project Information

Description: The primary goal is to reduce and repurpose food waste starting at Walla Walla University and scale to help the College Place community as well. We will accomplish this through composting programs, education, food redistribution, and working with restaurants, farmers, and schools to spread awareness and minimize waste.

Project Purpose: Minimize waste and inspire environmental action through composting.

Approach: We will accomplish this through a student-run group of individuals passionate about preserving our environment. We are partnering with the food vendors and suppliers, composting their food scraps, and aerating the waste every week on campus.

Location: Walla Walla University, Plant Services.

Please describe how your project relates to the Community Grant Program Goals and the City's Comprehensive Plan Goals and Policies.

Goal #10: In line with Goal #10 of **Growth Management Goals** which is to **Protect the environment and enhance the State's quality of life**, the project will reduce and repurpose food waste and accelerate Walla Walla University's mission towards achieving a green campus. In addition, this experience will be shared with other community entities interested in adopting this process.

Goal #15: In line with goal #15 of the **Comprehensive Plan Goals**, our composting program is an initiative that is environmentally sustainable and driven to reduce and repurpose food waste, in turn mitigating waste from the landfill and reducing water and energy usage.

Goal #29: In line with goal #29 **Comprehensive Plan Goals**, our composting project will create job opportunities, enhance community pride, and establish environmental empathy among our campus, the community, and business. We plan to expand this project and give it back to the community. We want the community to take ownership of the food waste collection and the composting process.

Project Budget (Must provide budget in this format)

Project Revenue	Amount
Grant Request	\$2,000
Cash Match from Applicant	\$1,000
In-kind match from Applicant	\$1,000
Cash from other Sources

Community Grants Program – City of College Place, WA

Walla Walla Tool Library

Proposal Summary

The Center for Humanitarian Engagement (CHE) at Walla Walla University is passionate about connecting our community in meaningful ways. The Walla Walla Tool Library (WWTL) is a new program designed to empower community members by making a variety of tools free and accessible. CHE is requesting \$3,500 to assist in marketing and purchasing of tools.

Project Description

The purpose of the Tool Library is to remove a barrier to community connection by providing the means with which to mobilize community members to work together for the common good. Being a good neighbor can mean a lot of different things. A common desire that we hear about is that people would like to help out their neighbors, churches, schools, and more by planning volunteer opportunities such as neighborhood clean ups, or work bees, or home repairs. But they often don't know where to start or where to find a budget for tools and supplies. People often inherently understand the "Why" and the "What" of civic engagement and community service; we are here to provide the "How."

The Walla Walla Tool Library's Vision is to cultivate spaces where neighbors can learn and grow together, and we aim to do the following:

- Promote equity among neighbors
- Reduce unnecessary waste
- Provide an atmosphere of learning to do it yourself

Our mission is to empower individuals to do their part in creating a stronger community through:

- Loaning tools and providing training
- Volunteer opportunities
- Hosting community workshops

CHE has already secured several thousand dollars' worth of tools and a large trailer to house them in. Additionally, CHE has already secured a comprehensive online tool management software tool and established a tool application process and waivers. This trailer will enable the WWTL to be mobile and arrive on-site for large-scale projects or cleanups. The location of the trailer will be consistent, stationed off of College Ave. On the Walla Walla University campus. The primary services offered will be regular open hours available to community members to

come by and borrow tools. Additionally, WWTL will host workshops, inviting community members to teach and learn from one another basic repair and maintenance techniques. More at <https://heynn.com/tool-shed>.

Goals

The goals of the WWTL are consistent with College Place Community Grants Program's goals. Particularly the following:

"Foster civic engagement and involvement"

- This is at the core of CHE and WWTL's goals for this project. It is our belief that civic engagement and involvement in meaningful community activities brings community members together. We have seen this illustrated by our management of the volunteer platform through United Way, and the community's response to disasters such as flooding in 2018 and the COVID-19 mass vaccination clinics.

"Develop responses and solutions which steward the community's health, environment, social network and resilience, park and recreation network."

- Each of these areas are impacted by WWTL's goals. Volunteering is a proven protector of health. Our friends at Blue Zones Project share that people with purpose live an average of 7 years longer – volunteering is an amazing way to discover your purpose.
- Building communities up as connected is a core goal of mobilizing and empowering people through WWTL. It allows the building of a social network and encourages resilience. We have discovered that people who are connected to their neighbors are more likely to reach out when they are in need.
- Volunteering, particularly in an outdoor setting for the betterment of our neighborhoods and community, is an incredible way to recreate. We will make it a goal to collaborate with the City of College Place's parks and recreation in every possible way.

"Develop programs which support community asset building and provide outreach through education and informational programs which support program goals"

- The WWTL is all about asset-building, education, and informational programs. Our goal is to empower community members in quite a literal way by providing them with tool assets as well as education. WWTL workshops will provide an amazing way for people to learn how to do basic repairs or maintenance on their cars, homes, tools, etc.

Project Milestones

WWTL has already achieved the following significant milestones:

- Secured a student employee focused on operation of the program.
- Secured an online tool management software resource to help make tool lending seamless and efficient.
- Secured a comprehensive online volunteer management system (Get Connected, through United Way) which will benefit the WWTL by providing a resource to volunteer efforts.
- Secured thousands of dollars' worth of tools through donations. One example of this was the College Place police chief's willingness to donate a sand blaster to the WWTL. Community members recognize the value of the program and are eager to donate.
- Designed a trailer wrap to assist in marketing.
- Finalized application process and waivers.

Successful achievement of project goals will require the following milestones:

Activity #1: Wrap

- Funding is needed to purchase a trailer wrap to assist in marketing.
- Trailer wrap will take place by February 6, 2023

Activity #2: Promotion

- Marketing and promotion will take place during the months of February and March which will involve speaking at local community locations and sharing fliers/brochures advertising services.

Activity #3: WWTL Launch

- The tool library launch will be an event celebrating the new community resource and will take place February 26, 2023. We will be highlighting our funders at this event. Regardless of funding, we would like to invite the City of Walla Walla to be present!

Activity #4: Tri-College Community Day

- Tri-college community day, taking place April 16, will be the first large-scale volunteer event that the WWTL will be present at.

Activity #5: First Workshop

- The WWTL's first community workshop will take place by March 3

Budget Plan

Oversight and management of the project will be run through CHE at Walla Walla University. Student labor, the majority of tools, and a significant amount of the marketing budgets are already funded and accounted for. We are requesting \$3,500 to finish funding the wrap and purchase additional essential tools prior to the project's launch:

Project Revenue	Amount
Grant Request	\$3,500
Cash Match from Applicant	\$2,000

Organization Representing: Common Roots Housing Trust (Common Roots)

Contact Address: c/o Blue Mountain Action Council, 8 East Cherry Street

City/State/Zip: Walla Walla, WA 99362

E-mail: rachel@commonrootshousing.org

Project Information Description of the project (include project purpose, approach and location).

Common Roots Housing Trust is a community-based organization born out of concern for how our region's (Columbia and Walla Walla counties and the Milton-Freewater area) worsening affordable homes crisis is affecting kids who grow up and go to school here, workers who work here, and seniors who retire here. In short, we are concerned about the future of our region if the people who sustain our communities, such as childcare workers, health aides, janitors, bus drivers, and retail and farm workers, cannot afford to live here. Homeownership is becoming increasingly out of reach for low-income households in our region—Walla Walla and Columbia counties and the Milton-Freewater area. For example, in 2021, 44% of all households in Walla Walla County earned less than \$50,000; those households could afford only 4% of the homes on the market that year. At the end of the third quarter of 2022, the median price of homes for sale in Walla Walla County was \$416,200. That was already out of reach for low- to moderate-income buyers in our region. As interest rates rise, the buying power of working families' already-limited income shrinks even further.

Common Roots Housing Trust is the Blue Mountain region's first community land trust (CLT)—a unique and proven model for creating permanently affordable homeownership opportunities for low- and moderate-income households. The establishment of Common Roots is a community-led response to our region's affordable homes crisis, and implements key recommendations from both Community Council's *Affordable Housing Study* and Walla Walla County's 5-Year Housing Plan.

Common Roots will hold land in trust and develop high-quality, energy-efficient houses in order to create a supply of permanently affordable homes for generations of community members that have steady incomes but can't afford market-rate homes. Common Roots will meet the housing needs of low- to moderate-income households (those earning 50-100% of Area Median Income), which aren't served by government housing programs, such as vouchers and project-based rental assistance, because they earn too much to qualify. Our primary focus will be housing people who earn low incomes (50-80% Area Median Income). Common Roots will own the land and residents will purchase the homes on top of the land through conventional mortgages. The mortgages on Common Roots homes are intended to be affordable, meaning the entire monthly mortgage will be no more than one-third of the household's monthly income at the time of purchase. Common Roots homes won't rely on permanent government subsidies to maintain affordability, and Common

Roots homeowners will be able to build equity and wealth. The initial subsidy that is used to develop the CLT home stays with the home when it is sold, so that Common Roots will not have to raise additional money to help subsequent low- and moderate-income buyers buy the home. Common Roots homes will be kept permanently affordable by restricting their resale price. This formula gives the selling household a fair return on their investment, while giving the next low- and moderate-income homebuyers access to the home at an affordable price. Limiting the resale price of Common Roots homes guarantees their permanent affordability for successive generations of low- to-moderate-income homebuyers. Common Roots will connect residents who earn low to moderate incomes to their communities by locating our homes with easy access to community resources. We will serve a diverse, multigenerational population by providing differently-sized homes scattered throughout our region, which will be designed to meet residents' different needs, including the needs of people with physical disabilities. Common Roots will also provide financial counseling to residents, to support their financial wellbeing and to help prevent them from foreclosing on their homes. There are over 225 CLTs in the United States and 16 CLTs in Washington State. Community land trust homeowners have far lower foreclosure rates compared to conventional homeowners— less than 1% of CLT homeowners foreclose on their homes.

Common Roots residents will be able to build equity, enjoy the pride of homeownership, participate in organizational decision-making, and establish roots in the community. By investing in residents, their homes, and the land beneath them, Common Roots will help to stabilize our region and sustain its distinctive, vibrant character.

Please describe how your project relates to the Community Grant Program Goals and the City's Comprehensive Plan Goals and Policies.

Common Roots Housing Trust will help the city of College Place meet its Community Grant Program Goals by supporting affordable housing in a way that helps to build the capacity of a crucial new community asset. Common Roots is a community-based organization that will hold land in trust to support the common good of keeping homes in our region permanently affordable for community members who earn low and moderate incomes. In a community land trust, the land held in trust is treated as a community asset, because it is used to keep housing affordable for the community and because community members who join the CLT have a say in how the land is used (CLT membership is open to everyone who lives in the region). Common Roots will follow the traditional CLT governance structure and will be a democratically run, member-based organization governed by a board of directors and managed by an executive director. Common Roots' board of directors will be comprised of public-sector representatives, general community representatives, and low-income Common Roots residents each representing a third of the board membership. Further, Common Roots' mission and permanently affordable homes will help to fulfill the city of College Place's Comprehensive Plan housing policy of "support[ing] strategies that minimize displacement of low-income community members."

With the support of a College Place Community Grant, Common Roots will be able to hire and pay our first executive director, who will fundraise for and oversee the development of our first permanently affordable homes. Though we have a highly competent founding board of directors that has been working diligently for nearly two years to establish Common Roots, without a

qualified full-time executive director, Common Roots will not be able to develop and provide homes for the community members that need them within a reasonable time frame.

The executive director will oversee Common Roots' operations, real estate development, and organizational growth and will be the primary representative in the community and the primary liaison between the board of directors, the staff, and all individuals and businesses who have a relationship with Common Roots. The executive director will lead business and strategic planning, project management, membership relations, outreach, homebuyer and leaseholder relations, and fundraising/grant writing to support operations and projects. The executive director will also be responsible for researching future projects, providing organizational management, and evaluating and expediting the financial and regulatory aspects of projects initiated by the board of directors.

Project Milestones Provide quarterly milestones, which indicate concrete progress toward the successful achievement of the project's goals.

Milestone	Responsible Party	Projected Date for Completion	Outcome
Hire Executive Director (ED)	Common Roots Board of Directors	4/15/2023	Common Roots' first ED is in place
Orient Common Roots' ED	Common Roots Board of Directors & Interim Coordinator	5/15/2023	Common Roots' ED understands Common Roots' development and is oriented to Common Roots' relationships and process and can steer the organization forward
Acquisition of Common Roots first parcel of land	Common Roots' ED	9/1/2023	Common Roots will have land upon which to build our first home(s)
Hold Common Roots' first annual general meeting	Common Roots' ED & Board of Directors	11/30/2023	Common Roots will be a democratically-run membership-based organization with a settled tripartite board of directors
Write & submit Common Roots' first Washington State Housing Trust Fund grant	Common Roots' ED	1/15/2024	Common Roots will have funding to develop its first homes

Community Grants Program – City of College Place, WA
Neighborhood Watch Community Block Party

Proposal Summary

The Garrison Creek Heights HOA II is a 59-member community above The Villages. Although most neighbors are kind and respectful to each other there has not been a lot of opportunities for neighbors to get to know each other and grow together. We have signs regarding neighborhood watch but we don't have a program in place. Chief Tomaras has offered to come and offer training and we believe the best way to do this is in a block party approach.

Project Description/ Goals

We are writing to request a grant of \$300 to support a community gathering in our neighborhood. The event's goal is to combat isolation and bring residents together to build a stronger community and provide training around neighborhood watch program.

Isolation is a growing problem in our society, and it can have negative effects on mental and physical health. Our community gathering aims to address this issue by providing a space for residents to connect with one another, share stories and experiences, and build relationships.

The event will include activities such as a potluck dinner, games, and live music. We will also be inviting local police department to participate in the event to provide information and resources to attendees.

We believe that this event will help to create a sense of belonging and community among residents, which will lead to a more connected and supportive neighborhood. The grant will be used towards covering the costs of food, decorations, and other necessary expenses.

We appreciate your consideration of this request and look forward to working with you to make our community a better place for all residents.

Project Milestones

We would aim to have the event in June before the weather gets to hot.

Project Information Description of the project (include project purpose, approach and location).

Our proposed project is to provide an 8-week half-day skills camp designed for middle school students of the city of College Place. These camps would begin June 26 and conclude on August 18. These camps are designed to provide attending youth with new skills and to refine other skills they may have. These will include cooking, leadership, art, gardening, and we will work with youth to develop additional interests as well. Last summer we provided similar skills camps for this age group and we plan to take information from last year to refine our planning and the way we present skills this year. We will provide our camps in collaboration with local partners (YWCA, Carnegie Picture Lab, Tri-State steel headers, etc.) and schools (Sager, Rogers, College Place High School, Walla Walla Valley Academy). These partnerships will improve the quality of our camps and help us spread the word about our activities, as well as mutually benefit every organization involved in these events. The camps will be located at SonBridge and other locations within the city of College Place.

Please describe how your project relates to the Community Grant Program Goals and the City's Comprehensive Plan Goals and Policies.

We are expanding the youth activities we offer in College Place. This will help create a family-oriented community where families feel this is a welcoming and safe place to raise their children. We are involving local businesses and organizations in our events to ensure beneficial relationships between all parties. Sharing in the vision of local schools, we desire to provide quality learning opportunities for the youth of College Place.

Project Information *Description of the project (include project purpose, approach and location).*

Walla Walla Valley Farm to School (WWVF2S) in partnership with College Place Public Schools (CPPS) and Blue Zones Project Walla Walla Valley (BZP), seeks to establish a school garden program at Davis Elementary School. Youth in our community have many unmet physical, mental, and emotional wellbeing needs. A school garden that is integrated with classroom curriculum, mental health services, social and emotional wellness, after school programs, and nutrition services would help fulfill and teach those social-emotional needs. A garden would connect students to their food sources and encourage healthier eating to build a foundation for lifelong healthy eating habits, in addition to the above social-emotional learning skills.

WWVF2S, BZP and CPPS will convene stakeholders to develop a sustainable plan for the build and use of a school garden at Davis Elementary School (Davis). This planning process, and subsequent school garden education, will be led by a Garden Education Manager (GEM) dedicated to Davis Elementary, who will be employed by the Sustainable Living Center (SLC). Once this school garden plan is developed, implementing partners will build one or more garden beds at Davis and host a community event to celebrate the garden's opening.

Planning and supporting gardens requires resources that WWVF2S has acquired and leveraged over the years in our region by serving other school districts. While there are many successful school garden programs in the Valley (including at four of five Walla Walla Public School District elementary schools), CPPS has yet to establish its own school garden program. Establishing a garden at Davis can serve as the beginning of a phased approach to district-wide school garden programming at CPPS.

Please describe how your project relates to the Community Grant Program Goals and the City's Comprehensive Plan Goals and Policies.

The Davis School Garden, and subsequent CPPS garden education program, will address several grant program goals:

Foster civic engagement and involvement. This program will promote collaboration between parents, the school, students, and community partners like WWVF2S and BZP. Engaging individuals to participate in programming that benefits the entire community empowers community members to meet (and work with) their neighbors and strengthens a sense of community identity by facilitating shared successes and goals.

Develop responses and solutions which steward the community's health, environment and social network and resiliency. One of our community's top well-being risk factors (according to the 2021 Real Age Test survey) is low fruit and vegetable consumption. A school garden program will directly address this by encouraging students to engage with growing their own produce and to eat more fruits and vegetables. WWVF2S also works to facilitate the use of local produce in school meals. Further, the garden program will support social-emotional learning and promote healthy coping behaviors for College Place youth. This program will also steward our environment by working with youth early to build knowledge of gardening, soil and ecosystem health, and plant life cycles – encouraging lifelong connections with nature and the environment. The garden program will strengthen our community resiliency and build social networks by establishing a collaborative project with collective goals. College Place community members from all backgrounds, with any level of garden experience, will be invited to contribute to this project. Building relationships across differences builds resiliency as folks learn they can support and count on people who are different from them.

The garden program also addresses several of the City's comprehensive Plan goals, policies and programs:

1. **Goal 19: Support a healthy community in which each individual has access to community resources and services.** Providing access to gardening and garden education through the public school system ensures that all College Place students have access to fresh, locally grown fruits and vegetables and all the other benefits associated with a school garden.
2. **Goal 29: Support programs, projects, and development efforts that enhance the job market and promote community pride.** Creating a program that engages parents, teachers, students and other community partners promote community pride through shared goals, successes and collaboration.
3. **Community Oriented Goal 3: Promote a family-friendly, community-oriented city that provides residents and visitors with a sense of place and engagement.** The school garden program will provide the community with family-friendly, educational, and beneficial in-school and after-school programming. The program will also engage people of all backgrounds to participate and contribute to the success of the garden.
4. **Community Oriented Policy 4: Promote unique community events and gatherings to bring people together and to foster a sense of place in the city.** The school garden program will create an opportunity for events like a garden clean-up, planting or harvest day, gardening education demonstrations, or cooking demonstrations. The program will

also build community pride and a sense of place by developing a shared goal and collective project that everyone can contribute to.

5. **Environmental Stewardship Goal 1: Preserve and protect the environmental integrity of College Place natural assets.** The school garden program will contribute to this goal by fostering an early appreciation for the natural world in youngsters through education, hands-on exploration, and excitement. Community members who have engaged directly with soil, ecosystems, and our climate will have a greater appreciation for the value that our natural assets bring to our community.
6. **Health and Wellness Goal 2: Explore opportunities for recreational programming and/or potential for a shared use agreement with the City of Walla Walla Parks and Recreation, College Place schools, and the Adventist school system.** The school garden program will provide numerous partnership opportunities for community partners including the College Place School District, the City, and the private school system. It will provide local assets that recreational programming can be built around for years to come.

Project Budget

List each resource needed to complete your project. Please show in-kind, applicant cash, and how much of the City's funds to be spent on this resource.

- *The value of volunteer labor as established by the Independent Sector's Value of*
- *Volunteer hours [https://www.independentsector.org/volunteer time](https://www.independentsector.org/volunteer-time)*
- *Equipment donated is valued at the hourly rental rate for the equipment used for the project.*
- *Donated professional services are valued at the "reasonable and customary" rate for the services.*
